Configuring LDAP Directory for Thunderbird

- Open the Thunderbird Application and Click on Tools and then Select Options from the list available.

- Once there Click on the Addressing Tab.
• Now you will want to place a **Checkmark** in the Box next to **Directory Server**: and **Click** on **Edit Directories**.
• You will be presented with a new window were you will want to **Click** on **Add**

![LDAP Directory Servers](image1.png)

• A new window will open where you will need to provide the following information:
  - **Name**: Suffolk Contacts
  - **Hostname**: sumail.suffolk.edu
  - **Base DN**: dc=suffolk,dc=edu
  - **Port**: 389
  - **Bind DN**: (Should be empty)
• Compare with image below.
